

Azure Cost Optimization Assessment

Data-Driven offers a 3-day assessment that includes a workshop for stakeholders and a detailed evaluation of your Azure footprint and architecture to optimize cloud costs. The assessment aims to understand your company's current Azure estate, help you design a strategic roadmap and provide recommendations to improve Azure cost management processes.

See what customers are saying:

"Data-Driven did a comprehensive audit of our Azure infrastructure and DevOps processes. They identified and improved several areas, saving our company thousands of dollars each month in subscription costs."

Rafic Habid, CEO, Clinic to Cloud

Our Offer?

Cost Saving

Understand your company's current Azure estate, use and over/underutilized resources, and help you design a strategic roadmap to remove or scale down/up your Azure services in order to reduce Azure spend.

Cost Management

Upon completion, we will deliver and walk you through a custom report with strategic recommendations to optimize your Azure spend every month and set a good governance process for better cost management.

Why our Cost Optimization Assessment?

Reduce your Cost and Increase Profit

Only pay for what you need by following our recommendations to save money with quick wins.

Gain Control of your Costs

You can't control what you can't see. We'll help you understand your environment, usage, and expenditure.

Improved Cost Governance & Accountability

Get recommendations for cost controls and best practices to ensure the right people are accountable for costs.

How does it work?

Workshop

Workshop with main stakeholders to understand companies processes and internal skillsets

Audit & Review

Understand your company's current Azure estate (current versus budget)

Documentation

Provide a strategic report containing opportunities to decrease costs and right-size resources

Final Presentation

Presentation of the current findings which includes recommendations to reduce Azure spending and improve governance

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
