

# Transform Your Data Into Actionable Insights

## About Data Foundation

Data-Driven offers a 4-week POC that delivers a modern, scalable data platform adding value from the outset. We differentiate ourselves by focusing on your Data Strategy and engaging key business stakeholders to identify the best use case for implementation.

### See what customers are saying:

*"TfNSW needed a solution to capture real-time data for every vehicle in motion across the state. This solution just gives us that so that we mine nuggets from this data."*

*Sandeep Mathur, TfNSW Program Manager*

## Our Offer?

### Data Strategy

We focus on your business Data Strategy by substantiating key business drivers, from which we identify and prioritise high value use cases.

### Modern Data Platform PoC

After prioritising key strategic data assets. Allow Data-Driven to deploy our tried and tested Modern Data Platform. We will implement a key business use case, offering visible business value after 4-weeks.

### Extensible Data Foundation

We provide an extensible framework built on native Azure products, following best practices, aligned with your business strategic goals.

# Why our Data Foundation?

## Remove Data Silos

Consolidate your data across the organisation and extract new insights from a single source of truth.

## Self-Service Analytics & Reporting

Enabling the ability to make critical business decisions based on accurate, timely insights, reducing time-to-value.

## Data Management & Governance

Your platform is built on best practices and comes with enterprise security, cost controls, scalability and data management tools.

## How does it work?

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
