CloudMonitor

Reduce your Cloud Spend with Automated Cost Optimization

CloudMonitor is a free tool that identifies cost-saving opportunities, so you pay only for what you need. It finds oversized or unused resources and suggests improvements based on utilization patterns.

Our Offer?

Cost Optimization Features

- Cost-Saving Recommendations
- Cost Anomaly Detection
- Scale-down Oversized Resources
- Pause or Remove Unused Resources
- Automated Schedules for Workloads
- Real-Time Cost Alerts in your Workflow
- Embed Cost Awareness in your Workflow

Cost Management Features

- Visualize and Understand your Cloud Spend
- Analyze Costs by Cost Group/Business Function
- Auto-Tag Resources
- Budget & Forecasting by Project/Cost Group
- Education and Cost Awareness
- Remediation Action
- Reduce Security Risks

See what customers are saying:

"Data-Driven did a comprehensive audit of our Azure infrastructure and DevOps processes. They identified and improved several areas, saving our company thousands of dollars each month in subscription costs."

Rafic Habib, CEO – Clinic to Cloud

Why CloudMonitor?

Lower your Cloud Consumption Costs
CloudMonitor finds and removes unnecessary costs by monitoring your cloud consumption in real-time and looking for cost savings

Understand Your Cloud Expenses & Gain Control
Better visibility of your cloud consumption and easy tools to evaluate and analyze your monthly spend to save costs
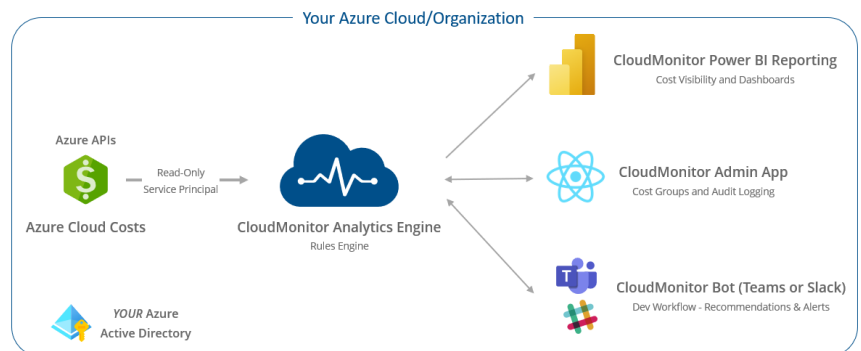

Educate Dev Teams on Best Practices
CloudMonitor teaches your dev teams how to right-size resources by suggesting improvements based on utilization and resources

Automated Cost Governance & Improve Security
CloudMonitor works 24×7 and monitors your environments for potential bill-shock, cost-saving opportunities, and anomalies

How does CloudMonitor work?

✓ CloudMonitor lives inside your Azure Tenancy. Your data never leaves.

✓ You chose the subscriptions you want to monitor with CloudMonitor.

✓ Receive cost anomalies and recommendations alerts via Teams or Slack.
