## Why Data-Driven?

Data-Driven AI is a Microsoft Gold Partner specialising in building modern data platforms and advanced analytics consulting, for your Data-Driven organisation

With Microsoft Power Platform, Automation is not an island and works as one intelligent automation platform.

### Power Automate as one intelligent automation platform

**Robotic process automation** – Create desktop flows in Power Automate Desktop to automate the user interface (UI) of your desktop. Connect modern and legacy systems together using a drag-and-drop visual flow designer and recorders that automate your mouse and keyboard actions.

**Artificial intelligence** – Add AI-driven capabilities like forms processing or intelligent document processing in [AI Builder](#).

**Digital Process Automation** – Create cloud flows and the 475+ built-in connectors with 1<sup>st</sup> and 3<sup>rd</sup> party connectors and build your own custom connectors.

**Business process management** – Automate guided, multistep processes using business process to manage everything from basic approval processes to advanced workflows using DPA or RPA.

**Process advisor (preview)** – Process advisor lets anyone share their processes so that you can analyze bottlenecks and get recommendations on how to improve using automation.
